STATEMENT OF VALUES

OUR MISSION

The Company has adopted this Statement of Values to express the standards it expects from its Directors, Senior Executives and Employees to fulfil its purpose and meet its goals. The Company aims to provide quality aquaculture products and delivery; thus meeting clients' demands and needs whether in existing and new markets. It also strives to maintain that the stocks were fished within biologically sustainable levels.

Our Values	Our Goals
Sustainability To benefit our clients, our stakeholders, and our suppliers, now and in the future, through the culture of aquatic organisms, while upholding ecological and socio-economic values.	Achieve sustainable development.
Integrity We are guided by our core values. Every interaction with our clients, our people and our suppliers are with respect, honesty, and transparency.	Increase and maximise returns and production by investing in the development or improvements of fish farms, cages, and hatcheries.
Perceptive We must think ahead to identify any issues before they arise and anticipate our clients' needs.	Reduce environmental impact and risk with help of technological development.
Collaborative We bring ideas and solutions to the table to create a two-way relationship and constantly strive to build strong relationships with our clients, stakeholders, and industry participants to build a solid track record for success.	Expansion of our distribution networks.
